

# Cascade's Free Rain Sensor Installation Program

## **Who is eligible?**

Any customer (commercial or residential) who is served by a member of Cascade Water Alliance or the [Saving Water Partnership](#) with an existing in-ground irrigation (sprinkler) system.

## **How does the program work?**

Simply contact any program partner (irrigation contractor) listed below and schedule an installation.

## **How much does it cost?**

There is no charge for the rain sensor, but you will need to pay the sales tax. Cascade pays the program partners up to \$50 for the labor costs of installing the rain sensor. Any labor costs over \$50 must be paid by the customer to the program partner.

## **How much are labor charges?**

Labor charges for rain sensor installation can vary, but typically range \$40 - \$75.

## **Why do labor charges vary?**

There may be compatibility issues with your controller or issues with the location of the rain sensor that add more time to the installation.

## **Is there an application process?**

No, simply contact a program partner and schedule the rain sensor installation.

## **Are the program partners licensed in Washington and insured?**

Yes.

Water for today...  
and tomorrow

**Does Cascade Water Alliance endorse any program partner or guarantee their work?**

No. Cascade has verified that the program partners are licensed and insured, but it is the customer’s responsibility to determine if they want the contractor to do the installation at their home or business. You may research complaints on any contractor by visiting the Washington State Department of Labor and Industries website: <https://fortress.wa.gov/lni/bbip/>

**What if I have questions?**

Contact Mike Brent at 425-453-1810 or [mbrent@cascadewater.org](mailto:mbrent@cascadewater.org).

To receive your free rain sensor and \$50 off installation, you must use one of the contractors listed below.

**Please note:** Not all contractors serve all types of customers. Please contact a contractor who serves the type of property where you want have a rain sensor installed.
